KEY PARTNERS

Universities and tech expos  
(NNU, BZU, AAUP & PTUK)

Sponsors and investors

Marketing agencies

Software developers

Hardware suppliers

Printing companies

Wedding halls and venues

KEY ACIVITIES

User Detection & Position  
**Alignment:** Detects the user and automatically centers them in the frame.

Face Readiness  
**Verification:** Checks that the face is forward, eyes are open, and the smile is visible before capture.

Autonomous Robot  
**Navigation:** Moves safely and smoothly while avoiding obstacles indoors.

KEY RESOURCES

DepthAI SDK + Pre-trained AI  
**Models:** Enables real-time user detection, face analysis, and positioning.

OpenCV + Local Web Interface:  
Captures photos and displays them instantly on the iPad.

Serial UART Communication  
**Protocol:** Connects the Raspberry Pi and Arduino for real-time control and synchronization.

Hardware Components: Includes Raspberry Pi 4, Arduino Mega 2560, OAK-D camera.

VALUE PROPOSITION

It offers an interactive, AI-enhanced photography experience that speaks to and reaches out to users ready to instantly capture and print a beautiful, high-quality souvenir photo, transforming traditional slow photography into an engaging and fast-paced experience that positively impacts the user's mood with a new, enjoyable, and inspiring experience.

CUSTOMER RELATIONSHIPS

Providing a completely autonomous photography experience ,Building a friendly connection through voice prompts ,Allowing users to actively participate by choosing, previewing, and customizing their photos before printing ,Offering event organizers performance analytics and technical support to ensure the success of their events.

CHANNELS

Partnering with event organizers, wedding venues, and corporate halls for on-site robot deployment ,Leveraging platforms like Instagram and TikTok to showcase the robot’s interactive features and high-quality results ,Using the robot’s attractive design and display in malls and exhibitions to attract spontaneous users.

CUSTOMER SEGMENTS

Event clients (weddings, parties), corporate events, event organizers, universities, shopping malls, entertainment centers, festivals, schools, influencers, and hotels.

COST STRUCTURE

Software development & maintenance

Hardware and equipment costs

Manufacturing and assembly

Marketing and promotion

Transportation and setup

Maintenance and repair

REVENUE STREAMS

Rental fees for events (main revenue)

Usage fees per session

Photo printing fees

Subscription contracts with venues

Premium/custom features

SECTION KEY

OFFER

## Thikra:

Is a smart photographer robot that started as a graduation project and has strong potential to grow into a real business idea. It offers an automated and interactive photography experience for events and public spaces, and with further development, it can become a marketable service in the event and entertainment industry.
